

PTS03001UNIV Varian-Agilent TriScroll 300 Pump

Features

Major Rebuild:

- Completely disassemble the pump module
- Completely clean all internal parts
- Install new tip seals and o-rings
- Assembly, Sync Crank Pins (3)
- Main crank shaft replaced as needed (at an additional cost)
- Remove all old bearings and replace with new bearings
- Perform bench test
- All Varian-Agilent TriScroll 300 pumps are tested to a base pressure of 10 millitorr or less

Standard Rebuild:

- Completely disassemble the pump module
- Completely clean all internal parts
- Pack bearings with high performance vacuum grease
- Install new tip seals and o-rings
- Perform bench test
- All Varian-Agilent TriScroll 300 pumps are tested to a base pressure of 10 millitorr or less
